

Distinctive pile fabrics for premium product design

British wool, recycled PET and bespoke high-pile constructions for apparel, accessories, interiors and luxury collaborations.

British wool

TRACEABLE PROVENANCE

Bespoke texture

PILE, COLOUR AND FINISH

Yorkshire made

DIRECT MILL COLLABORATION

THE JACKSON APPROACH

Distinctive materials begin with the complete product vision, balancing tactile identity, provenance, performance, conversion and commercial viability.

What the fabric needs to deliver

Jackson Textiles gives designers direct access to a working Yorkshire mill. We translate a visual and tactile brief into a controlled knitted construction, combining pile, density, fibre, colour, backing and finishing into a distinctive material.

Performance benefits

Tactile identity

High-pile knitting creates depth, softness and movement that can become a recognisable product signature.

Material storytelling

Traceable British wool supports natural, regional and craft-led narratives.

Design flexibility

Pile, weight, colour, pattern and finish can be developed around a collection or hero product.

Modern synthetic options

Selected PET constructions use up to 95% recycled content and can be dope-dyed for integral colour.

Accessible development

Low minimum order quantities open mill-led development to specialist and emerging brands.

Typical applications

- Outerwear linings and panels
- Collars, cuffs and trims
- Footwear and accessories
- Luxury pet and equestrian products
- Statement upholstery and soft interiors
- Limited editions and collaborations

Why Jackson Textiles

SPECIALIST CAPABILITY

Four decades of high-pile, sliver-knitted textile knowledge.

UNDER ONE ROOF

Fibre preparation, knitting, shearing, finishing and backing managed at Bowers Mill.

MADE TO SPECIFICATION

Fibre, pile height, weight, colour and finish selected around the end use.

WORLDWIDE SUPPLY

Fabric exported to customers in more than 40 countries.

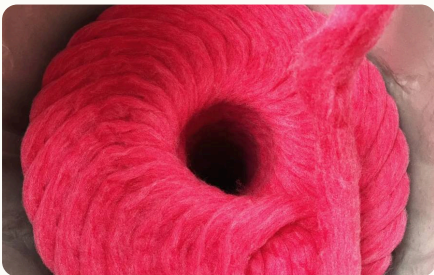

A specification built around the application

The design space below is indicative. The final data sheet is issued against the approved construction.

SPECIFICATION AREA	JACKSON TEXTILES CAPABILITY / TYPICAL OFFER
CONSTRUCTION	High-pile sliver-knitted fabric developed from a tactile, visual and functional brief.
WEIGHT CAPABILITY	Light-to-heavy bespoke constructions, with mill capability up to 3 kg per linear metre.
FIBRE OPTIONS	British wool, polyester PET and technical blends.
SAMPLING	Material direction refined through strike-offs, samples and agreed reference standards.
BACKING	Acrylic and other application-specific backing options for sewing, stability and conversion.
PILE AND TEXTURE	Controlled pile height and shearing; tumbled or sherpa-style finishes where suitable.
COLOUR	Natural British wool shades, broad PET palette and bespoke developments subject to minimum volumes.
PATTERN	Plain and multi-colour knitted designs; complexity is matched to weight and machine performance.

IMPORTANT

Typical values are guidance only and are not release specifications. Product width, roll length, tolerances, tests and declarations are confirmed in the quotation and approved technical schedule.

From brief to repeatable production

We combine direct mill access with a practical sample-led route, helping customers turn a product idea into a manufacturable and commercially credible specification.

Where Jackson Textiles adds value

DESIGNERS

Begin with mood, handle and end-use references; we translate them into achievable material variables.

SOURCING TEAMS

Access direct UK manufacture with documented fibre choices and specification control.

LUXURY HOUSES

Create exclusive materials whose value comes from construction, provenance and tactile distinction.

EMERGING BRANDS

Use lower development volumes to test a concept before committing to broader production.

What we need from your brief

- End use and contact points
- Target hand-feel and visual reference
- Fibre provenance and sustainability brief
- Weight, pile and drape requirement
- Colour, pattern and collection timing
- Conversion, care and test requirements

Development route

01

Define

Application, performance, aesthetics, volume and commercial target.

02

Select

Closest existing construction or a bespoke development route.

03

Sample

Review handle, colour, pile, backing and conversion compatibility.

04

Validate

Complete the agreed finished-product and compliance testing.

05

Approve

Lock the reference standard, tolerances and repeat-order requirements.

06

Produce

Manufacture against the approved reference standard, with repeat-order controls and recorded change management.
