

Veterinary bedding built for real-world care

Dense, washable high-pile bedding for veterinary practices, breeders, kennels, catteries, distributors and pet retailers.

**500,000+ m²**

MANUFACTURED ANNUALLY

Up to 95%

RECYCLED PET OPTIONS

40+ countries

SERVED WORLDWIDE

THE JACKSON APPROACH

A high-pile fabric should be engineered around the finished product, its environment and the commercial proposition, not selected by weight alone.

What the fabric needs to deliver

Jackson Textiles is the UK's leading manufacturer and wholesale supplier of veterinary bedding. The knitted pile provides a warm, supportive resting surface while compatible backing constructions allow moisture to pass away from the animal.

Performance benefits

Comfort and insulation

A deep pile creates a soft resting surface and helps separate the animal from a cold floor.

Moisture management

Liquid can pass through suitable backing constructions instead of remaining against the animal.

Repeated-use practicality

Washable, quick-drying constructions support demanding clinical, kennel and home environments.

Choice for every channel

Clinical white, plain colours, patterned ranges and bespoke designs support professional and retail markets.

Responsible fibre options

Selected constructions contain up to 95% recycled PET, with dope-dyed colour introduced during fibre manufacture.

Typical applications

- Veterinary recovery and ward use
- Whelping and breeding areas
- Kennels, catteries and rescue centres
- Crates, carriers and vehicle protection
- Retail pet beds, mats and cut-size products
- Senior, recovering and mobility-limited animals

Why Jackson Textiles

SPECIALIST CAPABILITY

Four decades of high-pile, sliver-knitted textile knowledge.

UNDER ONE ROOF

Fibre preparation, knitting, shearing, finishing and backing managed at Bowers Mill.

MADE TO SPECIFICATION

Fibre, pile height, weight, colour and finish selected around the end use.

COMMERCIALLY ACCESSIBLE

Low minimum order quantities for specialist manufacturers and growing brands.

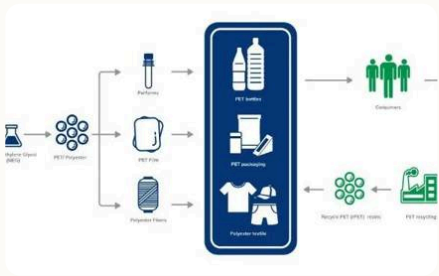

A specification built around the application

The design space below is indicative. The final data sheet is issued against the approved construction.

SPECIFICATION AREA	JACKSON TEXTILES CAPABILITY / TYPICAL OFFER
CONSTRUCTION	High-pile sliver-knitted fabric engineered for cushioning, drainage and durability.
GRADES	Core options MP30 and MP36; customer-facing technical values are confirmed in the quotation and technical schedule.
FIBRE	Polyester PET; selected constructions use up to 95% recycled content.
PREMIUM EXAMPLE	Approx. 28 mm pile; approx. 1,300 g/m ² ; approx. 1,950 g per linear metre, subject to agreed tolerance.
TYPICAL TRADE MOQ	24 rolls for UK customers and 48 rolls for international customers, with a minimum number of rolls per design; exceptions are agreed per account and confirmed at quotation.
CARE	Wash at 40 °C with non-biological detergent; no fabric softener; air or drip dry; brush once dry. Do not tumble dry.
STANDARD ROLL	Target 15 m length x 1.5 m width for core premium constructions; other formats by agreement.
BACKING OPTIONS	Traditional green, ribbed non-slip water-based latex, acrylic, and optional fire-retardant and antimicrobial constructions.
COLOUR AND DESIGN	Broad PET colour palette; plains and multi-colour patterns; bespoke development subject to volume and construction.

IMPORTANT

Typical values are guidance only and are not release specifications. Product width, roll length, tolerances, tests and declarations are confirmed in the quotation and approved technical schedule.

From brief to repeatable production

We combine direct mill access with a practical sample-led route, helping customers turn a product idea into a manufacturable and commercially credible specification.

Where Jackson Textiles adds value

DISTRIBUTORS

Build a differentiated range across backing types, weights, colours and exclusive pattern opportunities.

VETERINARY USERS

Specify the surface, drainage and hygiene features required for the working environment.

RETAILERS

Choose established designs or develop brand-led colours, packaging and private-label propositions.

CONVERTERS

Receive roll goods designed for cutting, sewing or assembly into finished products.

What we need from your brief

- Intended animal and environment
- Required backing and slip resistance
- Wash frequency and drying process
- Roll or converted-product format
- Target colour, design and branding
- Required testing, claims and documentation

Development route

01

Define

Application, performance, aesthetics, volume and commercial target.

02

Select

Closest existing construction or a bespoke development route.

03

Sample

Review handle, colour, pile, backing and conversion compatibility.

04

Validate

Complete the agreed finished-product and compliance testing.

05

Approve

Lock the reference standard, tolerances and repeat-order requirements.

06

Produce

Manufacture against the approved reference standard, with repeat-order controls and recorded change management.
